***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a method for displaying advertisements on an employee's paycheck stub based on a correlation between an advertisement data and the employee's data following an analysis.
- II. Claims 12-15, drawn to a method for providing an employer related to a given segment of employees a list of advertisers corresponding to a set of matching advertisements, receiving the employer's approval and notifying the approved advertisers of the selected matched advertisements.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility by itself such as providing an employer related to a given segment of employees a list of advertisers

corresponding to a set of matching advertisements, receiving the employer's approval and notifying the approved advertisers of the selected matched advertisements.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art and required a separate search and hence, restriction for examination purposes as indicated is proper.

A telephone call was made on 06/16/04 to request an oral election to the above restriction requirement and did not result in an election. Hence, Applicant is required to elect a group of claims for examination under **35 U.S.C. 121**.
